THE DIGITAL AGE

BLOCKCHAIN & FINANCES

- 
- ▶ Using 'Cryptography' and 'Peer' networking systems, a revolution was brought upon us by the unknown Satoshi Nakamoto in the form of Bitcoin. With time the underlying technology became popular and various use cases have popped up based on the primary features like 'Immutability' and 'Transparency'
 - ▶ With both the 'Bitcoin' and the 'Blockchain' growing extraordinarily, we saw a change in the financial and technological standpoint. We saw an influx of the users to the cryptocurrency market as it combined the users across the globe to a single financial system with interchangeable currencies with each currency having a trust based value in the use cases. This technology and a currency operating at a different plane of existence provided an opportunity to people of different geolocations or any barriers, to join together in a trust less ecosystem where everything is true and no trust is required because to do a fraudulent activity you have to work 10 times more than to be a honest peer in this system.

BLOCKCHAIN

BLOCKCHAIN & FINANCES

Blockchain is a system of recording transactions and copying it to multiple nodes to make it immutable. With multiple copies of the data online and multi party verifiability using cryptography, Blockchain has changed the way we handle sensitive data. This system is also known as Peer to Peer system because no one is above anyone and everyone shares same power and responsibility.

With cryptography the blockchain is made so secure that hacking it is not possible in any way. This is utilised in our smart contract to keep your funds secure and liquidity available. Our modus operandi is Decentralisation of the token and distribution of funds autonomously through smart contract.

ABOUT US

TRADE MOMENTS is a verified smart contract on TRON that can be accessed from anywhere in the world. TRADE MOMENT team is specialised in creative passive income sources globally. This is a Decentralised Finance project set to have no limitations on earning and no controller to access the funds, so we have no control over your money

We have created the smart contract in such a way that it functions autonomously using transaction cost as it's fuel. It requires no extra inputs and it's simple function is to calculate and distribute reward.

VISION

- 
- 
- We want to create a financially secure future and fight against financial insecurity by deploying an independent contract on an immutable system. We want to bring world together without any currency barrier and border. We also aim to create a system for passive income where no one is in control and the code does everything automatically on a platform that can not be hacked or changed.

HOW IT WORKS ?

All transactions will be under control of an TRON based smart contract without any control of any user or organisation, completely Decentralised. With every transaction the Smart Contract will automatically increase the price by calculating through a specified formula, which can never be changed once live. All investments are stored in the contract itself and can not be moved from there. By doing this, we ensure 100% liquidity always, and you can sell anytime you want. Selling in large volumes may incur price lowering as well since the formula is created in such a way that decides the price based on volume in circulation.

You will receive referral commissions on everyone you refer which is explained on the slide for referral rewards. You can see your rewards and commissions on the dashboard and create a withdrawal request for the same. Once approved your rewards will be transferred into your accounts.

VERIFIED CONTRACT

This financially very smart contract is set up on TRON blockchain and is verified on TRONSCAN. The smart contract is open to all and transparent, so anyone can verify the working of the code and see the transactions.

Every transaction you make will be directly through the blockchain and you can verify the transaction being mined within seconds of doing the transaction. We will publish the contract address on the website so that you can verify if your webpage has been compromised or not. With TRONLINKPRO/KLEVER APP Wallet, an added layer of security is provided for your convenience. All these factors make TRON MINE an unique approach to Level Plan using Blockchain.
